THE RESULTS

Crystal-clear sound and outstanding customer service

magicJack for BUSINESS Helps Multitasking Owner Stay Connected

Tala White owns Vizionz Unlimited, a small faith-based firm that provides graphic design and studio recording services as well as non-profit ministries to the Jackson, Mississippi community. Her main client base is small businesses, which she can certainly relate to in running her own business. That's why the service aspect of her work is so important.

"We understand the issues that small businesses face. One thing we can do to help our clients compete is to make sure their advertising and marketing is on point," White said. "Our motto for graphic design is 'It's not just a layout, it's your voice in your absence.'"

Multitasking is a way of life

Because she is involved in several different businesses and nonprofits, White is adept at multitasking and is often on the move about town.

Never being out of touch with her client base and others who may rely on her was critical to getting things done. White needed an affordable phone system that would help her, and her two employees, stay connected with individual voicemail and extensions, [virtual fax](#) and shared lines. “I have worked in both small and large offices before with all kinds of phone systems - T1s and landlines - but I found VoIP to be perfectly capable of meeting my needs.”

She conducted a price comparison between several vendors, including Vonage, and found magicJack for BUSINESS to be the most affordable by far. With magicJack for BUSINESS, businesses can pay up to 60% less than with other VoIP providers and enjoy an [annual savings](#) of nearly \$1,000 on the Home & Office Plan compared to the average phone/cable landline.

White did have one reservation about choosing magicJack for BUSINESS – she had never heard of the company before and didn’t want to go with an unknown entity. A quick, and very cordial phone call with magicJack for BUSINESS changed her mind, though. Her Atlanta-based service rep answered all her questions and demonstrated that she would be well covered with 24/7 dedicated phone support. “I am in the customer service business myself, so I appreciate people who take the time to treat others with respect and professionalism,” she said.

Now that she has the phone system up and running, one of the benefits she appreciates most is the flexibility that it provides. “If I am going to be out of town for a week working, I like to take the phone with me. I just plug it in at the hotel,” White said.

So she doesn't miss important calls when out of the office, her magicJack for BUSINESS phone forwards calls to her mobile phone. She can also transfer or [forward calls](#) to her employees. And, White has found the sound quality to be “crystal clear” without problems with dropped calls, jittering or call degradation.

“magicJack for BUSINESS makes phone and virtual fax affordable for my business. I was worried the sound quality wasn't going to be good, but it's GREAT! magicJack for BUSINESS makes running my business easy.”

Tala White

As White grows her business, she can foresee adding the [auto attendant feature](#) to enhance the level of professionalism to her first contact process. The auto attendant provides a variety of options to reach different departments, dial by name, leave a message, [dial by extension](#), and more.

White’s magicJack for BUSINESS phone has provided her with one unexpected benefit. Being in the music business herself, she really appreciates the [music on hold](#) feature. “It makes it seem like we are a large corporation,” she said.

Now that’s music to the ears of any small business owner.

About magicJack for BUSINESS

magicJack for BUSINESS is the smart choice for savvy business owners that want an easy-to-use internet phone system tailored to meet the unique needs of SMBs. With an ultra-low cost network infrastructure and proprietary telecom software, magicJack for BUSINESS provides a feature-rich, reliable, and affordable offering to entrepreneurs and small businesses who strive for phone service that will keep them professionally connected to customers while keeping expenses low.
